Judy Linton  
US Army Corps of Engineers  
PO Box 2946  
Portland, OR 97208

Dear Judy:

This is a request for modification of our permit (95-986) to construct the rail line in South Rivergate. The original permit authorizes 1.27 acres of fill in wetland areas for the rail track, with a 25' trestle to allow for wildlife passage.

We are now under construction, and are placing surcharge material on top of the rail bed. In order to allow equipment to cross the trestle area, and in order to provide adequate surcharge of the rail bed, we are requesting authorization to place temporary fill where the trestle will be. The fill area is 2,000 square feet, or 0.045 acres. Approximately 550 cubic yards of sand is needed to fill this area for 90 days. When surcharge has been completed, it will be removed in its entirety, the area restored, and the trestle constructed.

Thank you for your attention in this matter. If you need additional information, please contact Dana Siegfried at 731-7323.

Sincerely,

Bob Hrdlicka  
Director, Marine Division
